

### Astro Plane

The **astral plane**, also called the **astral world**, is a plane of existence by classical, oriental and esoteric philosophies.

I know how difficult it is for the average mind to grasp the reality of that which we cannot see with our physical eyes. It is hard for us to realize how partial our sight is to understand that we are all the time living in a vast world of which we see only a tiny part.

The first point which it is necessary to make clear in describing this astral plane is its absolute *reality*. And, I'm not speaking from that metaphysical standpoint.

Today, science tells us with no uncertain that this is so, for it describes to us whole worlds of minute life of whose existence we are entirely ignorant as far as our senses and yet we depend on our ability to preserve health, and in many cases life itself.

### Our Senses are Limited

We cannot see the very air that surrounds us, our senses give us no indication of its existence, except that when it is in motion we are aware of it by the sense of touch in our physical, "Three Dimensional World."

Clearly all about us there are potent forces which yet elude our poor and partial senses  
Obviously we must beware of falling into the fatally common error of supposing  
that what we see is all there is to see.
